Wrap Around Services

“From a wrap-around standpoint we should be putting a lot more effort into families and caregivers. Don’t wrap services around the client; wrap a support system around them.”

“I'm deeply grateful to have had the opportunity to undertake training to learn with my trainer. During that time I received amazing support and was able to overcome all the insecurities I had from never completing high school or even really passing a year of high school at all, so I didn't believe I'd be able to complete it. However I did and it was a steppingstone and a pathway which is now allowed me to further my education. I'm now in my first year undertaking a bachelors degree at a Uni in SA in Physiological Science & Counselling. I hope to go on to become a clinical psychologist working in the field of child protection and juvenile justice. None of this would have been possible if it wasn't for the support of my amazing lecturer, so I want to thank you all”
