

ROCKET'S POEM

Don't leave me
I've been broken and bruised
Feel like I've been used
You left here lying on the floor
I'm waiting for you to come back through the door
You just left me here for dead
Even though I can't get you out of my head
You are my lover you are my best ever friend
Please don't tell me this is the end
I need to feel your warm embrace
On my own this world I don't wanna face
I need you in my life
Without you I'm in strife
Don't just leave me here
Now you got me shaking in fear
I'm scared to be on my own
Without you I'm all alone
Please don't end it this way
I don't care what I gotta pay
I'll sell you my soul
I promise I won't roll
Do not leave me like this
I need one last kiss
My best friend and best ever lover
You are unlike any other
Without you I want my life to end
I need no one else to be my friend
One more dance
My last chance
I promise to come up with a brand new scheme
Just don't leave me methamphetamine
